

Loss Control & Safety Management

It's a 'no-brainer' really – the most cost-effective way to keep premiums low is to prevent workplace accidents in the first place. But to do so in a real work environment takes ongoing, professional programs that reduce accident exposure, educate workers and provide incentives for employees to always put safety first. It takes FHM.

To make sure your company is making the most of the safety techniques available today, FHM provides an initial assessment of your current Loss Control program, complete with suggestions for other proven accident prevention and cost reduction tools. Together, we work to develop a highly effective, comprehensive plan that can include:

- Safety policy/committee implementation
- Safety training programs
- Effective hiring practices
- Hazard communication and other OSHA-required programs
- Full (or post-injury only) drug-free workplace programs
- Employee safety awareness programs
- Management and employee incentive programs
- Updates on federal and state safety requirements

At FHM, we know that when it comes to Loss Control and Safety programs, a one-size-fits-all approach just doesn't cut it. That's why we tailor our programs to meet the needs of your specific operation, location and worker tasks. It's all part of our policy to keep the workplace safe. It's all part of our policy to do more.
